(54) **CASE IN MOBILE TERMINAL**

(57) Abstract:

PURPOSE: A case in a mobile terminal is provided so that the separation or combination of a case forming the external body of a mobile terminal can be achieved freely and easily. CONSTITUTION: A case in a mobile terminal includes a body(21) and a connection ring(22). In the body(21), an upper case(211) and a lower case(212) are formed. The upper case(211) and the lower case(212) form an accepting space(213). A fixing piece(214) is formed at a portion where the upper case(211) and the lower case(212) meet. A fixing groove is formed inwards at a side

of the fixing piece(214). The connection ring(22), inserted into the fixing piece(214), firmly fixes the upper case(211) and the lower case(212) or disassembles the assembly. The connection ring(22) consists of a mounting groove(221) and a fixing boss(222). The mounting groove(221) is fixedly inserted into the fixing piece(214). The fixing boss(222) is inserted into the fixing groove.
